

How to Remove Sophos Anti-Virus

1. Go to the Start Menu, Choose Settings, Then Control Panel, then Add/Remove Programs.

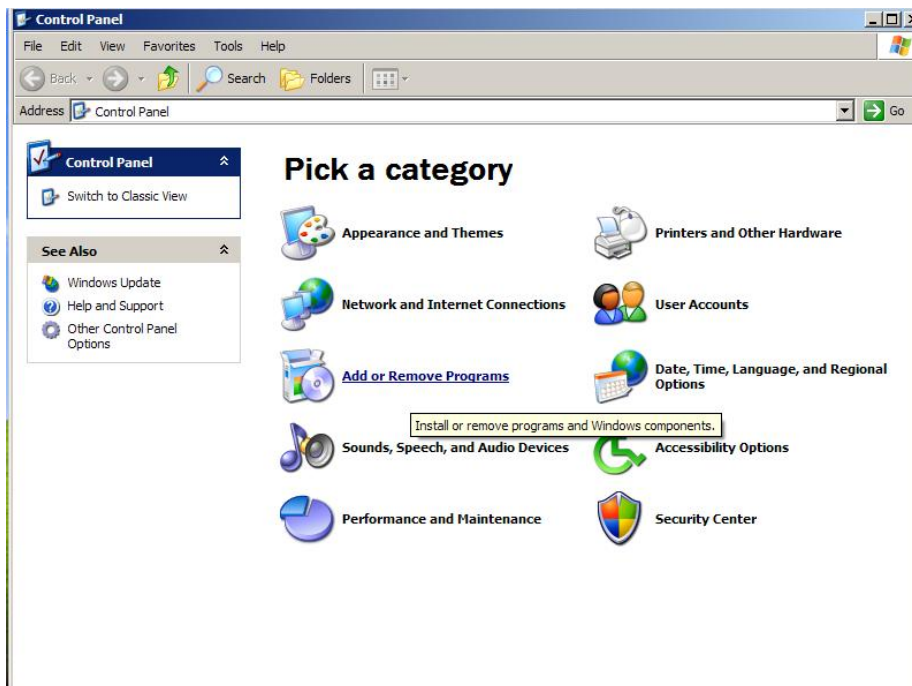

***In the event of following the above instructions and you do not have another menu within the control panel go through steps 1.1 – 1.2 and then Proceed to Step 2.**

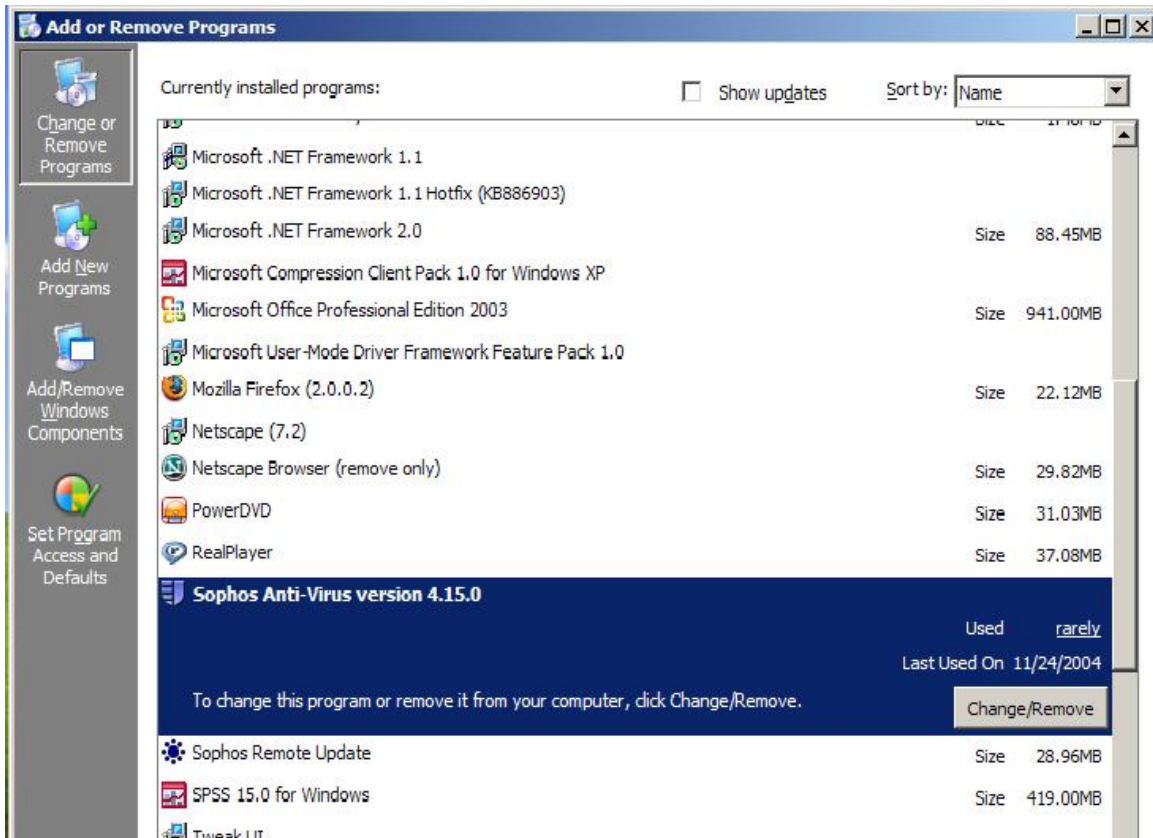

1.1. Click Control Panel.

1.2. Then Choose Add Remove Programs. Proceed to Step 2.

2. Choose Sophos Antivirus Version 4.x.x from the Installed Programs List and Click Remove.

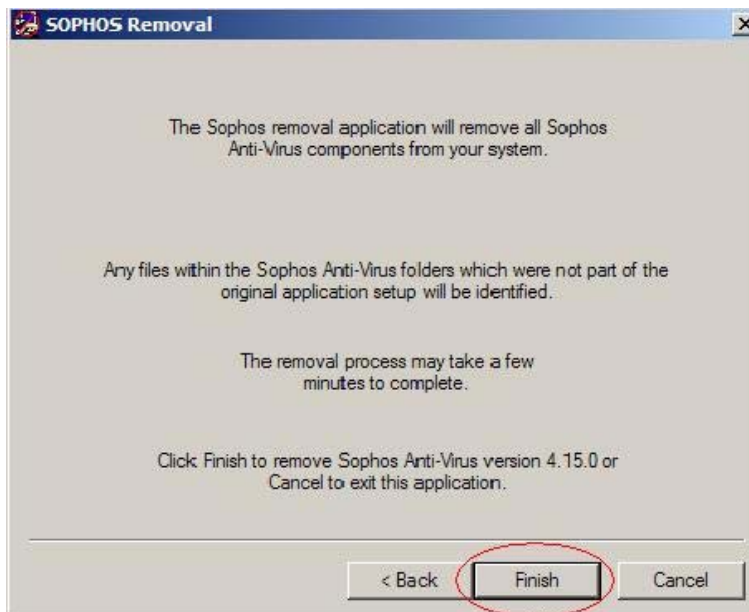

3. You will then see the following screen, where you will click Next.

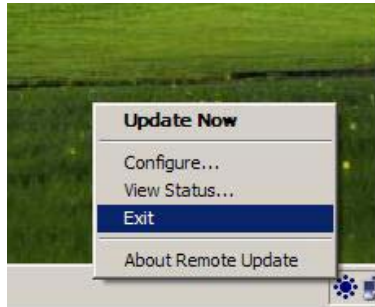

4. You will be prompted to close the Inter Check Monitor. Click Close and then Click Next.

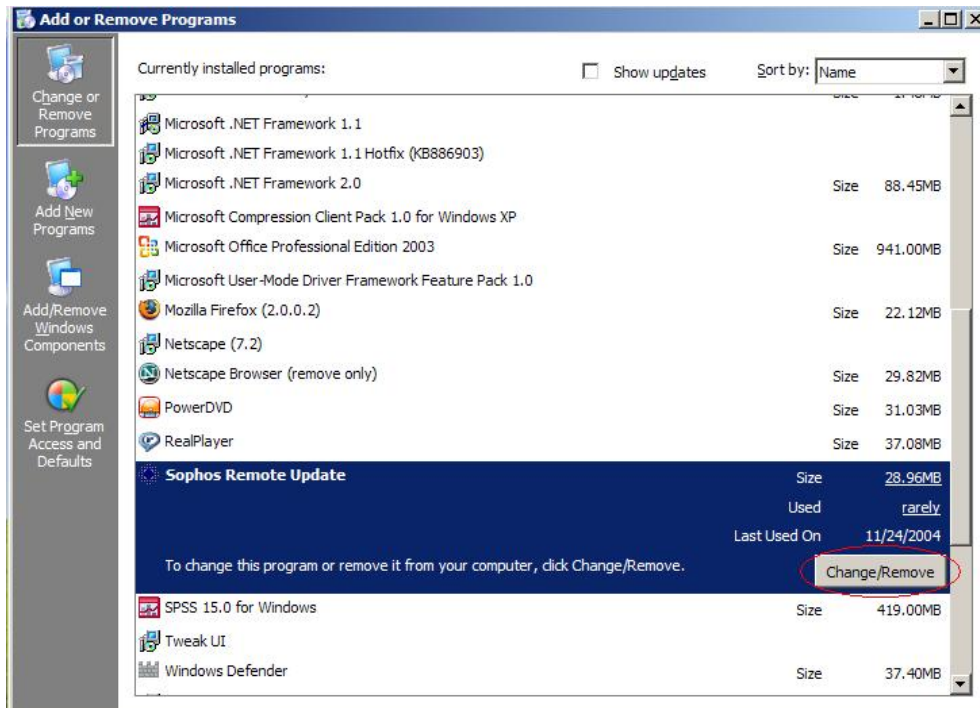

5. The application will be closed and then Sophos will proceed to be removed from your computer after you Click Finish.

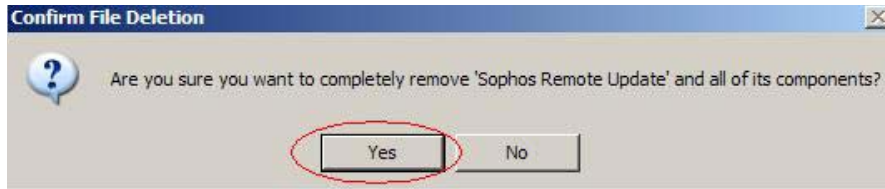

6. On the bottom right hand side of your taskbar. Right Click the Sophos Remote Update icon, then choose exit.

7. The Add/Remove Programs list will remain in the background. Choose Sophos Remote Update from the list and click Change/Remove.

8. After being prompted with the confirmation of removal as shown below. Choose Yes.

9. When the Un-installation is complete. Click Ok.

10. Restart your computer.
