How to Install a Network-Licensed Version of PASW Statistics 18

Important:

- PASW Statistics18 requires either Windows XP Professional or Apple MAC OS 10.x. It is not compatible with Windows 95 or Windows 98.
- PASW Statistics 18 installs from a DVD and your PC must have a working DVD-ROM drive. You may obtain a DVD from ITS (718-951-4357).
- The network-licensed version of PASW Statistics 18 allows many users to share a pool of PASW Statistics 18 licenses. When PASW Statistics18 is installed or run, the software connects to a special licensing server, which verifies that a license is available for your use. When you exit PASW Statistics 18, that license is returned to the pool for others to use. Currently only PCs can use Network-licensed PASW Statistics 18 sessions. MACs that cannot emulate a Windows PC require a special standalone license.
- While installing or using PASW Statistics 18 from off-campus, you must have an active network connection to the Internet, and you must first establish a VPN session with the college network. A VPN session (Virtual Private Network) allows your PC to bypass the college firewall to reach servers that are normally accessible only on campus. The VPN session also encrypts your communications to ensure your privacy. Since your session bypasses the college firewall, please use VPN only while you are accessing college systems and make sure that your PC is well protected against viruses and spyware. The VPN takes a few minutes to set up, but once it is configured on your PC, it can be launched easily by clicking on a special desktop icon.
- If you are installing PASW Statistics18 on campus, please proceed to page 10 of these instruction, since you do not need a VPN setup.
- If you have any questions or problems setting up VPN or PASW Statistics 18, please contact ITS Network Support at 718-677- 6180, or Netgroup@brooklyn.cuny.edu.

SETTING UP VPN ON YOUR XP PROFESSIONAL PC

1. Go to the Start Menu and Choose Settings, then choose Network Connections and double click. (Do Not Choose one of your existing Network Connections, Click the word Network Connections.)

If your Start Menu looks different from above. Go to the Start Menu, Choose Connect to, and then click Show All Connections. On the left hand side of the window you will then choose create a New Connection .

2. You will then see the screen below. Click on "Create a New Connection".

3. Click Next.

5	Welcome to the New Connection Wizard
- C	This wizard helps you:
	 Connect to the Internet.
	 Connect to a private network, such as your workplace network.
	 Set up a home or small office network.
	Lo continuo, cliox Next.

4. Choose the second radio Button option and click Next.

	Vhat do you want to do?
	Connect to the Internet
と	Connect to the Internet so you can browse the Web and read email.
6	Connect to the network at my workplace
-	Connect to a business network (using dial-up or VPN) so you can work from home, a field office, or another location.
0	Set up a home or small office network
	Connect to an existing home or small office network or set up a new one.
C	Set up an advanced connection
	Connect directly to another computer using your serial, parallel, or infrared port, or set up this computer so that other computers can connect to it.
	< Back Next > Cancel

5. Choose the second option. Click Next.
